CAREER OBJECTIVE

Motivated Computer Science student with knowledge of Python, Django, JavaScript, SQL, HTML, CSS, React, and Power BI. Seeking opportunities in Full Stack Development, Python Development, Data Analytics, and Business Intelligence to apply technical skills and contribute to impactful projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Web Technologies: HTML, CSS, React, Django Framework
Tools: VS Code, Git/GitHub
Analytics: Power BI
Concepts: OOPs, Web Development

PROJECT

Alankaara – Personalized Online Shopping Website | Django, React

- Developed an online shopping platform for browsing and purchasing fashion products.
- Implemented personalized product recommendations based on weather, occasion, colour, and body type.
- Built responsive frontend interfaces using React and backend functionality using Django.
- Integrated product and user data management through backend APIs and database operations.

Restaurant Business Analytics System | Python, Pandas, SQL, Power BI

- Analyzed restaurant sales and operational data to identify revenue and product-performance trends.
- Performed data cleaning, transformation, and exploratory analysis using Python.
- Created interactive Power BI dashboards to visualize business KPIs and support decision-making.

Target Roles

Full Stack Developer • Python Developer • Data Analyst • Business Intelligence Analyst

EDUCATION

2023 – 2027

B.E./B.Tech – AI & Software Engineering

Matrusri Engineering College
CGPA: 7.87

CERTIFICATIONS

• Python Certification – Simplilearn
• Fundamentals of Information Security – Infosys Springboard (June 2026)
• Cognizant Technoverse Hackathon 2026 – Certificate of Appreciation
• Web Application Development Internship – MANAC Infotech (July 2023 - October 2023)

ACHIEVEMENTS & ACTIVITIES

• Participated in MVSR Hackathon.
• Participated in Cognizant Technoverse Hackathon 2026.
• Completed internship in Web Application Development at MANAC Infotech (July 2023 - October 2023).
